

Welcome To

OMNILIFE

Insert coin to start: VRCADE

One area of video games that is always overlooked is the massive library of VR games that's been building in the last 5 years, with titles such as 'Among Us' and 'Half Life' all grabbing headlines worldwide with how immersive each game feels in VR. As such, Omnilife FCCU wanted to host an event where students could get together to experience a taste of what VR games are like, and what better way to do so than bringing people together to compete and battle against one another? Last month, Omnilife FCCU gathered its best players and duked it out in an all-out tournament, with the popular action-arcade fighting game TEKKEN7, and the universally known esports title FIFA.

Alongside these games, VR headsets were made available for demos of various VR games, courtesy of our business partners at Omnilife VR, where students were encouraged to try out virtual reality for themselves. VRcade was a huge success, not only with students but with the faculty as well!

XR (EXTENDED REALITY) HACKATHON

HACKATHON

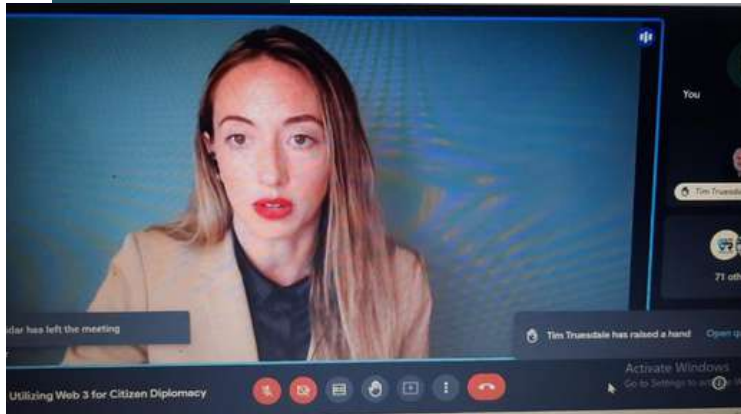

• XR HACKATHON

Think. Code. Innovate. With the theme of the hackathon being “**Generating Solutions to Global Problems through VR/AR Augmentation**”, our 2-day event featured participants from across the country, packed with educational talks, VR experiences, workshops, networking opportunities, merch giveaways, mini-games/trivia and much more! Some of the problem domains, to name a few, are Medical & Healthcare’, ‘Cultural Heritage’, and more!

Participants had 48 hours to come up with their products and pitches based around VR and AR augmentation, which were then evaluated by a panel of judges.

And that’s not all, a collective sum of 100,000 PKR was set aside as the prize pool, courtesy of our partner company, OmniLife VR Global.

Citizen Diplomacy and WEB3 : A Talk With Lydia Scherr

On October 10th, Omnilife FCCU hosted a webinar on "Utilizing Web3 For Citizen Diplomacy", with guest speaker Lydia Scherr, founder of 'The People's Accords', currently the only NGO in the world promoting Citizen Diplomacy by use of Web3. Many points were discussed during the webinar, including promoting citizen diplomacy among students, and how Pakistan could take advantage of it to improve its image and standing worldwide. The webinar was very well received and interactive, with many questions being asked and answered.

Spotlight on Hamza Ahmad, President

While our president and founder of Omnilife FCCU needs no introduction, we'd be negligent in our duty as writers to not mention what an integral part of the society he really is. Day or night, Hamza is always there to help with anything you may need. Despite his love for everything old-fashioned, in just a few short months, Hamza has catapulted Omnilife's name to celebrity-status here at FCCU, with many calling the society 'fresh' and 'exciting'. In the words of the man himself: "Technology is meant to empower us without inhibiting our creativity and vision.", and we can't wait to see what else our president has in store for us down the road, and beyond!
